EXAMPLE FIGURES - CONFIRM YOUR VEHICLE BEFORE DISPLAY / HIRE

[1] Height is an unladen example; gantries, racks and loads can increase overall height.

[2] Calculated level volume = 3.23 × 2.20 × 0.40 m; floor area = 3.23 × 2.20 m.

[3] The example payload includes occupants and cargo; tools and accessories reduce it.

Dense materials can reach the payload limit before the bed is full. Observe gross/axle limits.

Body builder, year, equipment and load restraints affect usable space and available payload.
